

DDH Australian Equities Fund

Overview of DDH Investment Funds

DDH Investment Access Funds is an investment offer that provides investors with access to QIC managed wholesale funds and a Bank of Queensland cash deposit fund. Investors can choose between six single and three multi-sector investment funds that offer a range of different asset classes and risk profiles, with exposure to a diverse range of asset classes including cash, fixed interest, property, Australian shares and International shares.

Investment objective

The DDH Australian Equities Fund invests in the QIC Active Australian Equities Facility No. 1 which provides active exposure to a combination of Australian equities - predominately large companies (QIC Active Large Companies Fund) and lesser exposure to small companies (QIC Active Small Companies Fund).

Benchmark

QIC aims to out-perform its benchmark, the S&P/ASX 200 Accumulation Index, by 2% p.a. (before investment management fees), over a rolling 3 year period.

Investment strategy

QIC actively manages the underlying funds using a style-neutral approach. Decisions about stock selection are determined by applying a fundamental, bottom-up, analytical process which is reviewed continuously. By adopting this approach QIC aims to achieve returns in excess of the benchmark.

Performance

The DDH Australian Equities Fund was established in October 2006 while the QIC funds in which it invests have been operating since December 2005. The funds have achieved the following performance to 30 June 2010:
